CBSE CLASS X • INFORMATION TECHNOLOGY (SUBJECT CODE 402)

UNIT 1: DIGITAL DOCUMENTATION (ADVANCED) — CHAPTER 1
INTRODUCTION TO STYLES — QUICK REVISION HANDOUT

Syllabus-Aligned Theory • Step Action Flows • 6 Categories Matrix • CBSE Exam Flashcards

1. Essential Shortcuts & Access Paths (1-Mark Quick Anchors)

Feature / Tool	Menu Path (LibreOffice / OpenOffice)	Shortcut / Quick Action
Open Styles Deck	Styles → Manage Styles *(LibreOffice)* Format → Styles and Formatting *(OpenOffice)*	**F11** (or **Alt + 2** / Sidebar Styles Deck)
Fill Format Mode	Inside Styles Deck (F11)	Click **Fill Format** (ink-pot) icon
Exit Fill Format	Keyboard / Mouse	Press **Esc** OR click Fill Format icon again
Undo Fill Action	Context action while mode is active	**Right-click** mouse anywhere in document
Update Selected Style	Style Actions → Update Selected Style	**Ctrl + Shift + F11**
Clone Formatting	Standard Toolbar	**Ctrl + Shift + C** (Direct formatting painter)

2. Style Definition & Core Advantages

- **Definition:** A **Style** is a named collection of formatting features and attributes (font, size, colour, alignment, borders, spacing) that defines the visual layout and behavior of document elements.
- **Consistent Formatting:** Ensures uniform appearance across all headings, body paragraphs, tables, and lists throughout lengthy documents.
- **Global Automatic Updates:** Modifying a style once automatically reflects across every document component associated with that style.
- **Efficiency & ToC Base:** Saves significant time compared to manual direct formatting and provides the mandatory heading hierarchy required to build automated Tables of Contents.

3. The Six Style Categories in LibreOffice Writer (CBSE 6-Level Hierarchy)

Category	Scope & What It Formats	Practical Examples & Exam Clues
1. Paragraph Style	Controls the formatting of an **entire paragraph** (line spacing, alignment, tab stops, indents, borders, text appearance).	*Heading 1, Heading 2, Body Text, Title, Subtitle*
2. Character Style	Formats **selected words, characters, or text blocks** inside a paragraph without altering paragraph layout.	*Emphasis, Strong Emphasis, Subscript, Superscript*
3. Page Style	Defines layout of pages: **page size, margins, orientation (portrait/landscape), headers, footers, borders, page numbers**.	*Default Page Style, Landscape, First Page, Envelope* **Exam Clue:** Margins, headers, footers = Page Style
4. Frame Style	Formats **frames, text boxes, and graphics with text containers** (padding, borders, wrap settings, callouts, captions).	*Graphics, Frame, Formula, Labels, Marginalia*
5. List Style	Controls **numbered and bulleted lists** (bullet types, numbering symbols, indentation, numbering alignment).	*Numbering 123, Bullet, Alphabet a b c, List 1*
6. Table Style	Applies predefined formatting sets to **tables and table elements** (header shading, alternate zebra striping, borders).	*Default Style, Academic, Box List Blue, Elegant*

4. High-Yield Comparative Matrices (CBSE 2-Mark Standard)

Comparison Parameter	Fill Format Mode	Clone Formatting (Format Painter)
Core Purpose	Applies a **named style** quickly to multiple scattered/non-contiguous areas.	Copies **direct manual formatting** from selected text and paints it onto target text.
Location & Icon	In **Styles Deck (F11)**; represented by an **ink-can / fill-pot icon**.	On **Standard Toolbar**; represented by a **paint-roller icon (Ctrl+Shift+C)**.
Deactivation & Undo	Press **Esc** to exit. **Right-click** undoes last action without quitting.	Press **Esc** or click icon again to deactivate.

Comparison Parameter	New Style from Selection	Update Selected Style (Ctrl+Shift+F11)
Action Performed	Creates a **brand-new, separately named style** using formatted text attributes.	**Modifies an existing style definition** to match newly modified formatting.
Document Impact	Does not alter other paragraphs; available as an independent style in the deck.	**Automatically updates all text** using that style across the entire document.
Naming Requirement	Requires entering a new unique name in Create Style dialog box.	Overwrites properties of existing style name; no new name entered.

5. Step-by-Step Practical Action Flows (Exact Exam Sequences)

A. Applying a Style: Select text/object → Open Styles Deck (**F11**) → Choose Category Icon → **Double-click** desired style name.

A-Notes IT-402

B. Using Fill Format Mode: Open Styles Deck (**F11**) → Select Style → Click **Fill Format** (ink-pot) icon → Click target paragraphs/frames or drag across characters → Press **Esc** to exit. *(Right-click undoes last fill)*.

C. Creating Style from Selection: Format object manually → Select it → Open Styles Deck (**F11**) → Click Category Icon → Click **Style Actions** dropdown → Select **New Style from Selection** → Type name → Click **OK**.

D. Creating Style via Drag and Drop: Format text → Open Styles Deck (**F11**) → Highlight formatted text → Drag selection into Styles Deck window and release → Type name in pop-up dialog → Click **OK**.

E. Updating Existing Style: Format text using existing style → Open Styles Deck (**F11**) → Highlight existing style name → Click **Style Actions** dropdown → Select **Update Selected Style** *(or **Ctrl+Shift+F11**)*.

F. Loading Styles from Template / Document: Open target document → Open Styles Deck (**F11**) → Style Actions dropdown → **Load Styles from Template...** → Choose Template (or click **From File...** to pick a document) → Check category boxes (Text, Frame, Pages, Numbering) → Check **Overwrite** (to replace same-named styles) → Click **OK**.

6. CBSE Exam Flashcards & Rapid Solvers

Q: Ramesh needs to apply a paragraph style to multiple scattered non-contiguous sections. What tool & exit method? [CBSE 2024 / SQP 2026]
Ans: Use **Fill Format Mode**. Exit by pressing the **Esc** key or clicking the Fill Format icon again.

Q: Which style category defines layout elements like margins, headers, and footers? [CBSE Board Set-4]
Ans: Page Style.

Q: What is the significance of the 'Overwrite' checkbox when loading styles? [CBSE Model]
Ans: It replaces existing styles in the destination document that have the exact same name as incoming styles. If unchecked, conflicting existing styles stay unchanged.

Q: Which of the following is NOT a style category in LibreOffice Writer: Page, Paragraph, Chart, Frame? [CBSE Board PYQ]
Ans: Chart (The six categories are: Page, Paragraph, Character, Frame, List, and Table).
